EXCELLENCE IN AIRCRAFT ENGINEERING

Aero Design Services was established in 1989 to offer professional engineering assistance and FAA approval of aircraft interior modifications.

Aero Design Services specializes in design and FAA DER approval of interiors for projects ranging from executive aircraft components to entire interior installations on commercial transport aircraft.

More specifically, Aero Design Services can provide:

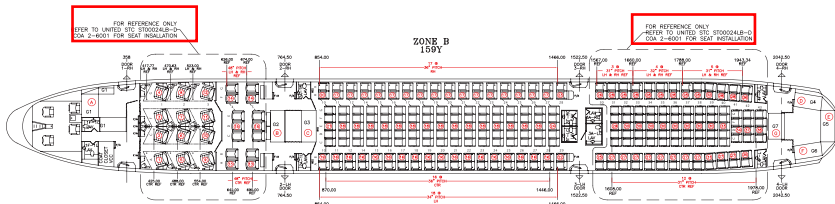

- **Preliminary or detail design of interior equipment and installation.**
- **FAA DER or STC approvals as required to meet your needs.**
- **Modification data or advice for compliance with numerous FAA legislative actions designed to enhance cabin safety.**

Aero Design Services would appreciate the opportunity to assist you in the development and completion of aircraft interior changes.
